To Our Valued Customers:

Re: Conflict Minerals

Rockform is aware of H.R. 4173, the Wall Street Reform and Consumer Protection Act. In addition to the financial market regulatory requirements relating to "Conflict Minerals" which include columbite-tantalite (coltan, niobium, tantalum), cassiterite (tin), gold and wolframite (tungsten), their derivatives, or other minerals designated by the Secretary of State.

We have gathered information from our Suppliers to determine if they use "conflict minerals" in the production of the carbide and/or carbide powders we purchase. After collecting all the data, we can confirm that we do in fact comply with H.R. 4173 requirements.

Sincerely,

A handwritten signature in black ink that reads "Rick".

Rick Smith
